Memo

То:	Resellers of Progeny Press Study Guides
From:	Michael S. Gilleland, Publisher
Date:	January 30, 2009
Re:	CPSIA Compliance
After carefully reviewing both the CPSIA and Letters of Opinion concerning publishers, we have reached the conclusion that Progeny Press study guides for literature are not subject to lead testing.	
In a letter dated January 15, 2009, Cheryl A. Falvey, General Counsel of the U.S. Consumer Product Safety Commission, stated in paragraph one of Page 2,	
inte boc boc	st, the CPSIA lead limits of section 101 do not apply to ordinary books ended for readers of all ages, including children. By definition those oks are not intended or designed <i>primarily</i> for children. Therefore, those oks do not need a general conformity certificate for lead content and do require third-party testing of any kind.
While it is true that the contents of Progeny Press study guides for literature are intended for teaching children about literature, the physical booklets and CDs are primarily for <i>teachers and parent educators</i> to use, either in making photocopies of appropriate pages for students to use in writing their answers or for printing out from their computers pages for students to use.	
To make this perfectly clear, all Progeny Press booklets shipped after February 1, 2009, will, on the back cover, contain the following language:	
	nis booklet is intended for use by teachers or parent educators. The neutrino of this booklet may be photocopied for students' use."
All Progeny Press CDs shipped after February 1, 2009, will, on the back of the envelope or on the envelope label, contain the following language:	
	his CD is intended for use by teachers or parent educators. The contents this CD may be printed for students' use."
If you have any further questions, please feel free to contact me.
