Timelines are a wonderful way to see all of history at a glance! They help visualize the procession of time and how one event spurs on another. They also help you see history by the slice – what was happening at various places in the world at the same time. Timelines help the most visual of learners grasp the abstract idea of “time” in a hands-on way. Your kinesthetic learner will benefit from the cutting and coloring of the figures. They are wonderful for the auditory learner as each figure has a descriptive text to remember key points of each person or event. Best of all, they inspire a love of learning about the people and events that made a mark in the world, reinforcing that knowledge by taking part in putting the “puzzle” of history together!

Included in this packet are over 280 detailed figures dating from the era of Napoleon to present-day world history, timelines ready to cut and assemble (color coded by this time period), suggested instructions for use and display, and this handy reference sheet.

Also available!! *Creation to Christ (Beginning to 1st Century, world history)*  
*Resurrection to Revolution (0-1799 AD, world history)*  
*America's History (Explorers to 21st Century)*
